RIBBON CUTTING CEREMONY: Kennedy Space Center is pleased to announce the activation of the newly upgraded Emergency Power Plant at the C-5 substation. To commemorate this important milestone, KSC is hosting a ribbon cutting ceremony on July 1, 1999 at 10 a.m. This project has modernized the Emergency Power Plant which supports all critical Space Shuttle operations in the LC-39 area by doubling generation capacity to 10 megawatts, improving reliability and enabling NASA to participate in Florida Power & Light's (FPL's) load control program. This program entitles NASA to receive a lower billing rate for electrical power consumed in the LC-39 area. This lower rate will result in an estimated annual savings of \$770,000. KSC contracted FPL for the design and installation services. Financing in the amount of \$6.84 million was provided through a third-party funding agreement which will be repaid using the annual savings. (FF-D3-B)

MAIL SERVICES: Requests for mail services should be submitted through your organizational admin office or contractor mail coordinator.
